THOR TWINES

The Thor range of net fibrillated baler twines are technologically advanced twines for the market.

TITELOC TECH

Unique multi-fibre fibrillated lattice structure for better grip and performance

Made for Australian conditions and featuring **Titeloc Tech**

Thor twines are manufactured on a state-of-the-art EVOTAPE extruder and feature our unique Titeloc fibrillation technology. Titeloc increases knot holding capability compared to standard polypropylene twines of the same runnage (m/kg).

Knot slip is the primary cause of failed “popped” knots resulting in bale breakage. With Titeloc you save time and money by having minimal knot slips and broken bales.

All Thor twines are UV stabilised for Australian conditions and feature Titeloc technology for better knot performance.

HIGH DENSITY LARGE SQUARE BALER TWINE

Our range of High Density Large Square Baler Twines feature Knot-Tech technology - a physical enhancement designed to boost knot grip.

BLUE TIGER PLUS HIGH DENSITY LARGE SQUARE Baler Twine

BLUE TIGER PLUS HD combines high tensile strength with long running spools, making it the ideal choice for contractors looking to increase efficiency through fewer spool changes. At a manageable 1250 m spool, BLUE TIGER PLUS HD was developed and tested in Australia with professional contractors who demand trouble-free high density baling all year round. BLUE TIGER PLUS includes Knot-Tech and is UV stabilised for Australia's harsh conditions.

Knot-Tech technology | Long running spool | UV stabilised
High tensile strength | Consistent performance

POPE BLUE TIGER XXX HIGH DENSITY LARGE SQUARE Baler Twine

BLUE TIGER XXX HD has the same high tensile strength and knot-grip performance as BLUE TIGER PLUS but in a more compact spool size allowing it to fit in all HD balers. Like its bigger brother, BLUE TIGER XXX HD was developed and tested in Australia with professional contractors who demand trouble-free high density baling all year round. BLUE TIGER XXX HD includes Knot-Tech and is UV stabilised for Australia's harsh conditions.

Knot-Tech technology | Compact spool | UV stabilised | All modern HD balers
High tensile strength | Consistent performance

POPE BLUE TIGER XXX NF HIGH DENSITY LARGE SQUARE Baler Twine

BLUE TIGER XXX HD NF combines high tensile strength with TITELoc fibrillation technology. TITELoc increases knot holding capacity compared to standard polypropylene twines of the same runnage (m/kg). U/V Stabilised For Australian Conditions.

Titeloc Fibrillation | Compact Spool | UV stabilised | High Strength

POPE RHINO PLUS HIGH DENSITY LARGE SQUARE Baler Twine

POPE RHINO PLUS Big Square Baler Twine was developed with the professional contractor in mind. With 1400 m spools and consistent baling performance, Rhino Plus delivers greater baling efficiencies and more bales per day. U/V Stabilised For Australian Conditions.

Strong knot performance | UV stabilised | Long running spool

Application	Code	Brand	Colour	Length/Spool	Spool Weight	Spools/Pack	Knot Resistance	Packs/Pallet
HD LARGE SQUARE	1100001015	Blue Tiger Plus HD	Blue	1250 m	11.7 kg	2	265 kgf	36
HD LARGE SQUARE	1100010186	Blue Tiger XXX HD	Blue	1100 m	10.3 kg	2	265 kgf	24
HD LARGE SQUARE	1100013628	Blue Tiger XXX HD NF	Blue	1100 m	10.3 kg	2	265 kgf	24
HD LARGE SQUARE	1100010307	Rhino Plus	Yellow	1400 m	10.4 kg	2	220 kgf	24

SMALL SQUARE BALER TWINE

POPE RHINO Small Square Baler Twine

RHINO is a premium quality small square baler twine. With a knot strength of 110 kgf, Rhino is ideal for heavy lucerne or pasture hay.

Rhino is available in two convenient spool sizes:

Rhino Small Square, a 1500 m compact spool suitable for all small square balers.

Rhino Small Square Plus, a 2500 m spool for increased baler efficiency.

Bright yellow | Long running or compact spool | UV stabilised

High tensile strength | Consistent performance

BULLDOG BLUE Small Square Twine

Bulldog Blue is a consistent performer bale after bale. It is available in three convenient pack sizes.

Knot stability and grip | UV protected

Easy feed and soft on knotters

Bright blue

ROUND BALER TWINE

BULLDOG BIG ROLL Baler Twine is available in bright blue or pink.

Perfect spooling | Knot stability and grip | UV protected

Easy feed and soft on knotters

NET REPLACEMENT FILM

NET REPLACEMENT FILM

POPE NET REPLACEMENT FILM is of 5-layer co-extruded construction and is suited to round balers with film capability. Film on film silage production has many benefits over traditional film on balenet systems. These include:

Improved silage quality due to better oxygen barrier and tighter bales | Easy removal of film at feeding time | 100 % recyclable with silage film | Higher density bales | 19 um

Code	Brand	Colour	Width/Roll	Length/Roll	Thickness	Core Material	Rolls/Pallet
1100013651	Pope Net Replacement Film	White	1.28 m	1800 m	19 um	Cardboard	20
110013652	Pope Net Replacement Film	White	1.38 m	1800 m	19 um	Cardboard	20
1100011676	Silage Film Repair tape	White	10 cm	20 m	25 um	Cardboard	48 Rolls/ Carton

POPE RHINO SILAGE COVERS

POPE'S RHINO silage covers are crafted with premium co-extruded polyethylene and are stabilized against UV and heat, ensuring protection in Australia's harsh environment for at least 12 months. The covers feature a white reflective outer layer and a black airtight inner layer for efficient silage production. They come in 2 gauges and are ideal for:

BUNKER COVERS AND SILAGE PIT COVERS
MODULE COVERS FOR LARGE SQUARE SILAGE

- High strength
- Impact resistant
- 12-month UV protection
- Multilayer construction

Code	Brand	Colour	Size	Thickness
1100011937	Rhino Silage Cover	Black/White	12 m x 50 m	150 um
1100011938	Rhino Silage Cover	Black/White	12 m x 50 m	200 um
1100011940	Rhino Silage Cover	Black/White	15 m x 50 m	200 um
1100011942	Rhino Silage Cover	Black/White	18 m x 50 m	200 um
1100013173	Rhino Silage Cover	Black/White	20 m x 200 m	200 um

POPE RHINO COMBI SILAGE COVERS

highly
effective
barrier
film

Pope Rhino Combi features the oxygen seal green liner, a 45 micron impermeable film that prevents oxygen from entering silage. This 9-layer film is lightweight yet strong and easy to handle. Its unique oxygen barrier film is more effective than traditional silage sheeting, reducing DM losses, minimising waste, and improving aerobic stability.

Code	Brand	Colour	Size	Thickness
1100013172	Rhino Combi Silage Cover	Black/White	20 m x 50 m	160 um
with underlay Oxygen Seal Liner - green tint 45 um

BALE NETWRAP

MEGANET bale netwrap has excellent tensile strength, high resistance to tearing, and maximum protection against UV radiation. Meganet is the best solution for perfect baling and is recognised by farmers and contractors worldwide for its reliable performance, even under the harshest conditions. As a premium bale netwrap, Meganet provides consistent and uniform bale coverage even during fast baling. It is suitable for all crops (straw, silage, corn, pasture, and cereal hay) and works under all weather conditions. Meganet is your best choice for round baling:

Compatible with all popular balers | High breaking strength | Maximum bale coverage
UV stabilised and antistatic treated | End-of-roll warning | Available in rolls up to 4500 m

MAGLIA GRANDE

If you are looking for a high-quality netwrap that can handle any forage crop, look no further than Maglia Grande. This netwrap has 25 reinforced chains that create a wide mesh, which gives it amazing strength and durability. Whether you are wrapping straw, silage, corn, pasture, or cereal hay, Maglia Grande will keep your bales secure and protected. It also comes in different widths to fit any size of bale.

Designed for modern balers | Extreme strength | UV stabilised | Improved bale compression

SILAGE FILM

POPE BULLDOG™ 7-Layer Silage Film

POPE BULLDOG 7 is a coextruded 7-layer film developed for those contractors looking for consistent performance bale after bale. As a 7-layer film, POPE BULLDOG 7 has less variability in film thickness and strength.

Good silage quality relies on the film sealing in the nutrient-rich goodness while preventing oxygen ingress. POPE BULLDOG 7 produces excellent results for all silage applications because of its tight tolerances.

7-layer construction | UV stabilised for Australian conditions | Ideal for high-speed wrapping | Suitable for round or square bales | High tack level for a superior oxygen barrier | Consistent performance Plastic core 50 - 70 % stretch

TIGER SUN XTRA STRETCH Pro 7 Silage Film

TIGER SUN XTRA STRETCH Pro 7 Silage Film is a co-extruded 7-layer film developed for those contractors looking for consistent performance bale after bale.

As a 7-layer film, TIGER SUN XTRA STRETCH Pro 7 has less variability in film thickness and strength.

Good silage quality relies on the film sealing in the nutrient-rich goodness while preventing oxygen ingress. TIGER SUN XTRA STRETCH Pro 7 produces excellent results for all silage applications because of its tight tolerances.

7-layer construction | UV stabilised for Australian conditions | Ideal for high-speed wrapping | Suitable for round or square bales | High tack level for a superior oxygen barrier | Consistent performance Plastic core 50 - 70 % stretch

HARVEST ADVANTAGE 5 Silage Film

HARVEST ADVANTAGE 5 Silage Film is a 5-layer film. It fits all wrapping machines and has the right level of tackiness and elasticity to produce quality silage bales even under extreme conditions.

Harvest Advantage 5 is a consistent performer on Grass and Crop Silage.

UV stabilised | Puncture and tear resistant | High oxygen barrier | 5-layer construction | 50 - 70 % stretch Plastic core

Rhino - Pro7

Farm Storage Bag

Best Quality, Great Price

Rhino - Pro7 Farm Storage Bags are a cost-effective way to store coarse grains on-farm. They provide a short-term storage solution that improves grain logistics and marketing choices at harvest.

Rhino - Pro7 Farm Storage Bags are ideal for storing wheat, barley, oats, triticale, sorghum, maize and silage.

Manufactured to strict ISO 9001 QA standards, Rhino - Pro7 Farm Storage Bags are formulated with quality polymer resins to produce a seven-layered co-extruded polyethylene film. The reflective white outer layers contain heat resistant resins and UV stabilisers to protect against Australia's harsh UV and heat conditions. The black inner layer shields against light and moisture.

Store your grain securely with Rhino – Pro7 Farm Storage Bags. They are available in sizes that can accommodate grain inloaders with diameters of 9 ft (2.75 m) or 10 ft (3.05 m).

Features & Benefits:

7-layer quality film for better performance | 250 um thickness for strength and durability | Heat and UV stabilised for Australia's harsh conditions | 9 ft (2.75 m) diameter | 10 ft (3.05 m) diameter | Puncture and impact resistance | Tear resistance | 10 % Stretch for tight packing | Stretch indicator on bag

Code	Brand	Diameter	Length	Thickness	Bags/Pallet
1100011591	RHINO - Pro7	9 ft (2.75 m)	75 m	250 um	8
1100011592	RHINO - Pro7	9 ft (2.75 m)	90 m	250 um	8
1100013159	RHINO - Pro7	10 ft (3.05 m)	100 m	250 um	6

Custom Sizes Available

Custom sizes can be made and come in diameters of 9 ft(2.75 m), 10 ft (3.05 m) and 12 ft (3.66 m) and lengths up to 150 m.
